26 May 2016

Dear Valued Partner,

This letter serves as your formal notification that Vega is initiating the end-of-life process for the VPR-39 power supply and battery charger.

This notice allows for appropriate planning on your behalf and the opportunity for any last time purchases of the VPR-39, as well as to suggest alternative products. The standard warranty terms will be honoured for all units shipped up to the last shipment date.

The key milestones for the discontinuation and last time purchases are below:

Milestones	Date
End of life announcement day	26 May 2016
Last order date	30 May 2016
Last shipment day	15 June 2016

Vega has tested several products from external manufacturers which we recommended as a replacement to the VPR-39 power supply. These alternative power supplies are outlined in the VPR-39 Alternative Advisory Document but will not be stocked by Vega.

Please contact our solution engineers to advise you on the most suitable power supply. To download the VPR-39 Replacement Advisory Document or for further information, please visit <http://www.vega.co.nz/Support/>.

Thank you and best regards,

Otinél Meszaros
